TI-83+/84+ Quick Reference Sheet

Algebra 1 Level

Calculator ID #:
Choose 2nd MEM,
#1 About
ID****_****_****

To Graph Lines (functions):

1. Enter equation in Y=.
2. Use ZOOM #6 (will give standard 10 x 10 window).
3. Use GRAPH to display graph.
4. Use WINDOW (to create your own screen settings).
5. Use TRACE to move spider on graph – arrow up/down between graphs

To Find Intersection Pts:

1. Graph both equations.
2. Use CALC menu (2nd TRACE)
Choose #5 Intersect
3. Simply press <ENTER> 3 times to reveal the answer.

If you are looking for more than one intersection point, you must repeat this process.

To Plot Histograms and Box-Whisker Plots:

1. Place data in Lists: STAT → EDIT
2. Set up plot information: STAT PLOT #1 <ENTER>
Highlight ON, choose symbol for histogram, XList: L₁
OR choose symbol for box-whisker, Freq: 1
3. Graph: ZOOM #9 - TRACE to see values on graph
4. Xscl under WINDOW controls width of bars on histogram. An integer value is easiest to read.

To Get Statistical Information:

1. Place data in Lists: STAT → EDIT
2. Engage 1-Variable Statistics: STAT → CALC #1 1-VAR STATS
3. On Home Screen indicate list containing the data: 1-VAR STATS L₁
 \bar{x} = mean
 s_x = the sample standard deviation
 σ_x = the population standard deviation
 n = the sample size (# of pieces of data)
Q₁ = data at the first quartile
med = data at the median (second quartile)
Q₃ = data at the third quartile

To Get Scatter Plots and Regressions (Linear, Quadratic, Exponential, Power, etc):

1. Place data in Lists: STAT → EDIT
2. Graph scatter plot: STAT PLOT #1 <ENTER> Choose ON.
Choose the symbol for scatter plot, choose L₁, L₂, choose mark
3. To graph, choose: ZOOM #9
4. To get regression equation: STAT → CALC #4 Lin Reg(ax+b)
(or whichever regression is needed)
5. On Home Screen: LinReg(ax+b) L₁, L₂, Y₁
6. to see graph - GRAPH

To get Y₁ on the calculator screen:
VARS → Y-VARS
FUNCTION
Y₁
