| A graphing calculator and a straightedge (ruler) must be available for you to use while |
| taking this examination. | - иопрегррәр

the questions during the examination. Your answer sheet cannot be accepted if you fail to sign this prior to the examination and that you have neither given nor received assistance in answering any of of the answer sheet, indicating that you had no unlawful knowledge of the questions or answers
When you have completed the examination, you must sign the statement printed at the end

 Scrap paper is not permitted for any part of this examination, but yo
in this booklet as scrap paper. A perforated sheet of scrap graph paper is provided at the end of this Scrap paper is not permitted for any part of this examination, but you may use the blank space The formulas that you may need to answer some questions in this examination are found at the
end of the examination. This sheet is perforated so you may remove it from this booklet. are not necessarily drawn to scale. etc. Utilize the information provided for each question to determine your answer. Note that diagrams indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, sheet. Write your answers to the questions in Parts II, III, and IV directly in this booklet. All work examination. Record your answers to the Part I multiple-choice questions on the separate answer
sheet. Write your answers to the questions in Parts II, III, and IV directly in this booklet. All work This examination has four parts, with a total of 37 questions. You must answer all questions in this proctor for completing the student information on your answer sheet. Print your name and the name of your school on the lines above.

 （2）exponential decay function Which type of function best models the given data？

| $\mathbf{x}$ | $\mathbf{f} \mathbf{( x )}$ |
| :---: | :---: |
| 0 | 1 |
| 1 | 3 |
| 2 | 9 |
| 3 | 27 |

5 Students were asked to write $6 x^{5}+8 x-3 x^{3}+7 x^{7}$ in standard form．
Shown below are four student responses．

$$
\begin{array}{ll}\text { Anne：} 7 x^{7}+6 x^{5}-3 x^{3}+8 x \\ \text { Bob：}-3 x^{3}+6 x^{5}+7 x^{7}+8 x \\ \text { Carrie：} 8 x+7 x^{7}+6 x^{5}-3 x^{3} \\ \text { Dylan：} 8 x-3 x^{3}+6 x^{5}+7 x^{7}\end{array}
$$

Which student is correct？
$\begin{array}{ll}\text {（1）Anne } & \text {（3）Carrie } \\ \text {（2）Bob } & \text {（4）Dylan }\end{array}$
6 The function $f$ is shown in the table below．
（2）shifted 3 units to the right（4）shifted 5 units to the right

| $\omega$ | $N$ | - | $O$ | $x$ |
| :--- | :--- | :--- | :--- | :--- |
| $N$ | $\omega$ | $\omega$ | - | $\vec{X}$ |

When compared to the graph of $f(x)$ ，the graph of $g(x)$ is

13 When $3 a+7 b>2 a-8 b$ is solved for $a$, the result is
$\begin{array}{ll}\text { (1) } a>-b & \text { (3) } a<-15 b \\ \text { (2) } a<-b & \text { (4) } a>-15 b\end{array}$
(1) 21.3
(2) 38.2
Of the people who preferred burgers, approximately what percentage
were female?

| 12 Jenna took a survey of her senior class to see whether they preferred |
| :--- |
| pizza or burgers. The results are summarized in the table below. |
| $\qquad$Male 23 Pizza |
| Female | 31 

11 Which situation can be modeled by a linear function?
(1) The population of bacteria triples every day.
(2) The value of a cell phone depreciates at a rate of 3.5
(3) An amusement park allows 50 people to enter every
(4) A baseball tournament eliminates half of the tear
round.
10 David wanted to go on an amusement park ride. A sign posted at the
entrance read "You must be greater than 4 inches tall and no more
than 57 inches tall for this ride." Which inequality would model the
height, $x$, required for this amusement park ride?
$\begin{array}{ll}\text { (1) } 42<x \leq 57 & \text { (3) } 42<x \text { or } x \leq 57 \\ \text { (2) } 42>x \geq 57 & \text { (4) } 42>x \text { or } x \geq 57\end{array}$
Use this space for
computations.

Use this space for
computations.

(1) I and II, only
(2) I and III, only

II and III, only
18 Which ordered pair does not represent a point on the graph of
$y=3 x^{2}-x+7$ ?

| (1) $(-1.5,15.25)$ | (3) $(1.25,10.25)$ |
| :--- | :--- |
| (2) $(0.5,7.25)$ | (4) $(2.5,23.25)$ |

19 Given the following three sequences:

[^0]

|  | 'III |
| :---: | :---: |
|  | II |
|  | ' |

18 Which ordered pair does not represent a point on the graph of

> $\begin{array}{ll}\text { (2) } 2 \% & \text { (4) } 0.02 \%\end{array}$
> (1) $98 \%$ started decaying, and $f(t)$ represents the population of the remaining
bacteria at time $t$. What is the rate of decay for this population? $f(t)=1000(0.98)^{t}$, where $t$ represents the time since the population
started decaying, and $f(t)$ represents the population of the remaining

> 23 A population of bacteria can be modeled by the function ,

$$
\begin{aligned}
& \text { (2) } 13
\end{aligned}
$$

 indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, Answer all 4 questions in this part. Each correct answer will receive 4 credits. Clearly

36 A system of inequalities is graphed on the set of axes below.

Answer the question in this part. A correct answer will receive 6 credits. Clearly indicate
the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc.
Utilize the information provided to determine your answer. Note that diagramsare not necessarily
drawn to scale. A correct numerical answer with no work shown will receive only 1 credit.
All answers should be written in pen, except for graphs and drawings, which should be done
in pencil. [6] AI ${ }^{\text {.re }}{ }^{\mathbf{d}}$

[^0]:    The population, $P(x)$, for these years can be modeled by the function
    $P(x)=a b^{x}$, where $b$ is rounded to the nearest thousandth. Which
    statements about this function are true?

    $$
    \begin{array}{ll}\text { I. } \quad a=3810 \\ \text { II. } \quad a=4224\end{array}
    $$

    III. $b=0.035$
    IV. $b=1.035$$\quad \begin{aligned} & \text { (3) II and III } \\ & \text { (1) I and III } \\ & \text { (4) II and IV I and IV }\end{aligned} \begin{aligned} & \text { (2) When written in factored form, } 4 w^{2}-11 w-3 \text { is equivalent to } \\ & \text { (1) }(2 w+1)(2 w-3) \\ & \text { (3) }(4 w+1)(w-3) \\ & \text { (2) }(2 w-1)(2 w+3)\end{aligned}$

    $$
    \begin{aligned}
    & \text { (1) I and III } \\
    & \text { (2) I and IV }
    \end{aligned}
    $$

[^1]:    20 A grocery store sells packages of beef. The function $C(w)$
    represents the cost, in dollars, of a package of beef weighing
    $w$ pounds. The most appropriate domain for this function would be
    $\begin{array}{ll}\text { (1) integers } & \text { (3) positive integers } \\ \text { (2) rational numbers } & \text { (4) positive rational numbers }\end{array}$

    20 A grocery store sells packages of beef. The function $C(w)$
